

MAXI Range

1.2mØ SEWAGE & WASTEWATER PUMPING STATION

The Maxi Range of package pump stations are designed to collect foul water from multiple properties or buildings which houses multiple people such as commercial offices and other industrial sized commercial applications.

The Maxi Range has been designed to ensure an easy and trouble free installation and is manufactured in high grade HDPE. The Maxi Range of pump stations are delivered to site as a complete package, including all internal pipe work, 2 sewage pumps and alternating control panel and float switches.

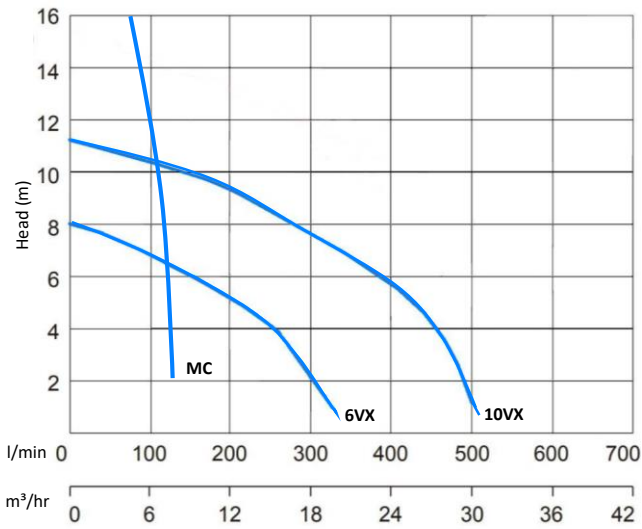

This system also comes with guide rail and pedestal kit for easy pump access. The station is designed to pump through a 63mm pump main as the chamber's outlet terminates in a 2" male BSP thread as standard.

The Maxi Range pump station allows multiple 110mm inlet (to be drilled on site) to enable a quick and easy installation. Also available in single pump configurations.

For detailed instructions for wiring and installation, please review the installation manual.

65mm & 80mm solid handling pumps are available upon request.

Chamber Dimensions			Access Cover	
Diameter	Height	Capacity	Size	Rating
1200mm	1500mm 2000mm 2500mm	1600L 2400L 2800L	600 x 750 (mm)	Pedestrian
