

3P Rain Tank Components

Overflow Siphons

3P Overflow Siphons - Adequate overflow is essential for optimum tank water quality- Inadequate overflow is the primary cause of odour in failed rainwater systems.

3P Overflow Siphon Uno
Art No. 4000260
 With screw threaded union connector - ideal for installation through plastic tank wall.

3P Overflow Siphon Mono
Art No. 4000250
 With rodent and odour barrier - with skimming effect on tank water surface utilising chamfered inlet slots.

3P Overflow Siphon Duo
Art No. 4000200
 The 3P Overflow Siphon Duo is installed inside the rainwater tank - between the filter and the tank wall overflow outlet.

3P Overflow Siphon DN100-Without Rodent Barrier
Art No. 4000210
 Basic overflow.

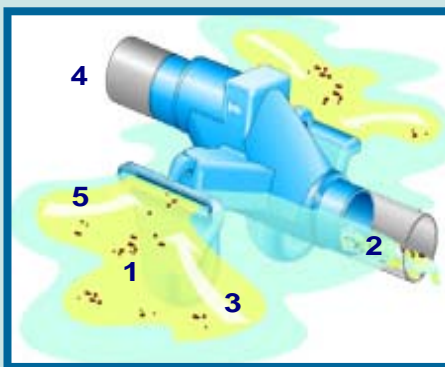

3P Overflow Siphon DN100-Steel Bars Rodent Barrier
Art No. 4000215
 Basic overflow with steel bars to keep out rodents.

3P Overflow Siphon DN100-Spiral Rodent Barrier
Art No. 4000310
 Basic overflow with premium rodent barrier.

3P Giant Overflow Siphon DN250-150 With Rodent Barrier
Art No. 4000220

1. As the tank water level rises, the water flows over the skimmer siphon inlet into the sewer or to an infiltration soakaway. Any floating materials are skimmed off via the chamfered slots.

2. The surplus water with the pollen is led out of the rainwater tank. Outlet 110mm.

3. An Odour Trap is provided by the siphon.

4. Connection filter side for 110mm pipe (3P Overflow Siphon Duo).

5. Rodent entry is prevented, because of slim slots and tight angle bends.

3P Rain Tank Components

Overflow Siphons, Floating Intakes & Calmed Inlets

3P Floating Intakes - Enables abstraction of the cleanest rainwater from the storage tank

3P Floating Intake
Art No. 4000620
Float Ball at
15cm Diameter
Filter Inlet
Check Valve - 1"
2m suction Pipe
Other fittings available

3P Floating Intake 30cm
Art No.
Float Ball Diameter 15cm
Filter Inlet sleeve mesh
Check Valve - 1"
30cm suction Pipe
Range of connections
available

3P Giant Floating Intake
Art No.
Float Ball Diameter 15cm
Filter Inlet sleeve mesh
Check Valve - 2"
Range of connections
available

3P Calmed Inlet
125mm/110mm
Art No. 4000100
Prevents disturbance of
settled sedimentation layer.

3P Giant Calmed Inlet
150mm/250mm
Art No.
Prevents disturbance of
settled sedimentation layer
in large tanks.

3P Rapid Connector
Art No. 1000210
Enables connection of
plain ended 110mm pipe.
Useful in tank turrets.

3P Filter, Calmed Inlet,
Overflow Siphon and
Floating Intake utilised
inside a Rainwater Tank.

*There are a wide range of fixtures and fittings available
3P can make up bespoke fittings if ordered in bulk*
