

It makes sense to fit a surestop valve with your water softener

Surestop Valves are made from glass filled nylon that's not affected by hard water, and they come with a handy easy-to-access remote switch. Once a Water Softener is installed, the traditional brass stopcock can be totally inaccessible.

Look at the benefits:

The remote switch is fitted in a convenient place, making it easy to access and turn off the water should the need arise.

The ideal add-on sale product for water softeners

MAINS WATER IN

The Surestop Valve is available in Push-Fit and Compression. It can be fitted in 30 minutes and is maintenance free.
