

Surestop smart water control

Protecting property from risk of water damage
Full burst protection system when used with water sensor
Ability to zone your water control

Adding value and peace of mind to plumbing installations

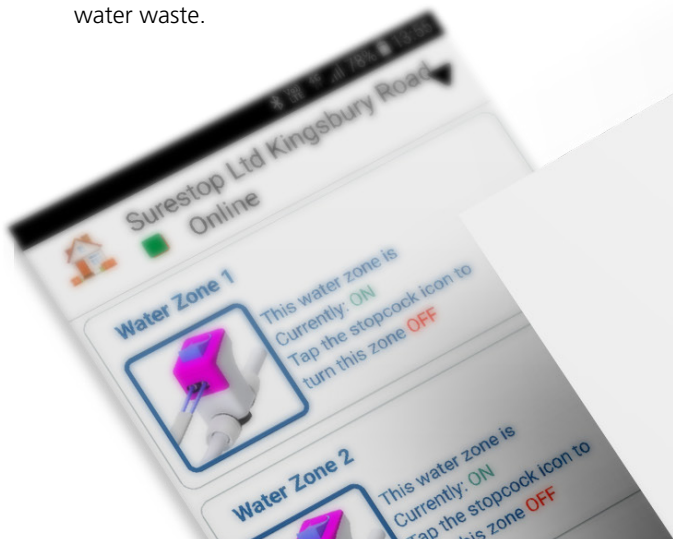

Welcome to Surestop

Surestop is a unique and innovative company that is focused around protecting property from the risk of water damage and water waste. This commitment is reflected with our latest WRAS approved patented product the **i-watercontrol** system. This product gives increased ease and flexibility for isolating water supply.

The new **i-watercontrol** system enables you to control your water any time any place, any where in the world using our Web portal or IOS and Android APP. This system enables multiple valves to be paired to a single hub giving zonal control in a property. In addition we have the added flexibility of adding multiple hubs through our web portal, giving you the ability of controlling water remotely in separate individual properties.

We see this system giving reduction to damage repairs caused by water leaks and the additional saving to emergency call out costs. Giving the ability to isolate water in an emergency via a mobile device will dramatically reduce the time taken to isolate the water giving huge savings in water waste.

According to leading insurer Direct Line, the average household cost for damage caused by a burst water pipe is £7000, with the smallest of leaks quickly becoming an expensive issue to rectify. If you own or manage more than one house that experiences a leak, these costs could significantly mount up.

Surestop WRAS Approved Patented Stopcock Valve and Smart Control Switch.

Battery operated smart switch enables mobile connectivity when used in conjunction with Surestop IoT Hub.

- Does not suffer from seizing due to limescale build up
- Push fit installation suitable for plastic and copper pipe systems
- Smart switch can be located up to 6m away from the valve
- Suitable for cold water supply 23°C max at 10 Bar
- Comes with 2m smart switch connector tubing as standard
- Two year warranty

surestop®

Protecting property from the risk of water damage

How Surestop meets the needs of all our customers

Reduced Risk

Whether it be a single or large housing stock, in a one-floor or multi-floor property, damage caused by water leaks can be extremely costly. The Surestop product offers a cutting edge solution to reduce water damage caused by leaks and reduce repair costs due to out of hours emergency repairs.

Simple & Quick Installation

Surestop not only adds value to your installation but it is also quick and easy to install. The product takes approximately 30 mins to be installed and is suitable for all trades. No mains electrical installation will be required.

Flexibility

Our ability to pair multiple valves to a single Surestop hub gives the ability to control water in zones. The WEB portal also allows users to have multiple hubs associated to a single portal enabling external water control over various properties. Our Android and Apple app mirrors the WEB portal giving further external control and flexibility for those times when computer access isn't available.

There is also the **i-watercontrol** switch located in the property that gives the ability for the houseowner to control their water locally in line with bylaws.

Finally there is the manual failsafe switch located on top of the valve in case of network or battery failure.

High Quality Product

Our Surestop products are patented and every product is manufactured and 100% pressure and function tested from our facility in the West Midlands. This enables us to ensure our customers expectations of quality and performance is achieved with every product.

Network of UK Stockists

At Surestop we have a nationwide network of reliable stockists, who sell our products in-branch and online.

For help on finding your nearest stockist visit our website www.surestop.co.uk.

Surestop endeavour to support our stockists with both information and training.

Surestop Stopcock with App and Remote Switch

Our IoT Connect product consists of a WRAS approved Stopcock Water Valve, 2m of tubing with our new WRAS approved controller switch.

Benefits

- External control 24/7
- Can easily replace existing brass stopcocks
- WRAS approved for drinking water
- 15mm and 22mm options for installation with plastic or copper pipe
- Cold water supply max 23°C at 10 bar
- Control switch for onsite or offsite water control
- Web portal and smartphone app for immediate access
- Can be used for multiple installation within one building
- Two year warranty

Product Code	Remote Switch Including Tubing		Push Fit	Compression Fitting	Plastic or Copper Pipe Sizes		Max Bar at 23°C	Gravity Fed Systems BAR Pressure to Open Valve
	2m	6m			15mm	22mm		
SS-15-PL-CS	●		●		●		10	0.5
SS-22-PL-CS	●		●			●	10	0.5

The 10+ number of units can be made up from mix and match of products (SS-15-PL-CS or SS-22-PL-CS or SS-IoT-HUB)

Benefits

- All of the above
- Wifi Water leak detection
- Notification to mobile device that leak detected
- Sensor cable giving larger detection area
- Using multiple water detectors in conjunction with multiple **i-watercontrol** controllers gives zone control

Product Code	Remote Switch Including Tubing		Push Fit	Compression Fitting	Plastic or Copper Pipe Sizes		Max Bar at 23°C	Gravity Fed Systems BAR Pressure to Open Valve
	2m	6m			15mm	22mm
