

Harvesting Clean Energy / Protecting Our Environment

## **Overview**

# **Enhanced Design Features**

#### **Control Panel**

The Condor Energy Pod 401 uses an advanced electrical controller, It is a DES7320 auto control parallel monitoring system. It can be used manually or automatically as it comes with auto fault alarm protection functions and standards.

#### **Design Quality**

The Condor Energy Pod 401 has been manufactured using the highest grade of manufacturing technology available insuring a robust and durable design.

#### Our Mission -

#### We design products that harvest clean energy, minimising the impact on the environment.

In line with the UK and European governments commitments of realizing zero net carbon by 2050, we are focused on reducing carbon emissions throughout our business and supply chains by bringing the most innovative and advance products to market in line with progress to a circular economy.

### **Intelligent Sustainable**

#### **Power Supply**

The Condor Energy Pod 401 significantly reduces CO<sub>2</sub> emissions and reduces on fuel costs. It has been designed to utilize energy from the sun and wind thus delivering sustainable power to remote sites where needed.

It comes complete with a backup generator that runs on HVO Hydro treated vegetable oil which automatically starts when the batteries become low ensuring constant and consistent clean power 24hrs per day.

The Condor Energy Pod Intelligently transfers wind and solar energy to charge the onboard Lithium Iron Phosphate batteries.

This energy to power transition is managed by the smart control module ensuring the user only needs to position the units on site, open out the Solar PV panels and extend the wind turbine mast and press start.

The Condor Energy Pod 401 has a prime power rating of 75kVA and can be interconnected, delivering more power onsite where needed.

#### **CLEAN SUSTAINABLE RESPONSIVE POWER SUPPLY:**

The Condor Energy Pod 401 can be used in conjunction with further Solar PV panels. The Condor Energy Pods unique design allows the Solar PV panels to tilt and adjust insuring maximum absorbtion of the suns rays during daylight hours thus maximising the overall charging performance. Delivering more sustainable power. The battery storage capacity can also be increased upon request.

#### **Features**

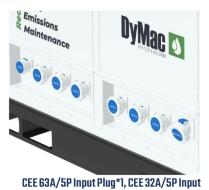

The All in One unit is an intelligently designed economically sufficient power system that ensures the reduction of harmful CO, gases to the atmosphere.

It has been developed for prime power applications and has a quick and easy set up time. The unit is mainly used for delivering power to on site office cabins, drying rooms and wash room facilities where mains power is unavailable.

# **Superior Features**

CEE 63A/5P Input Plug\*1, CEE 32A/5P Input Plug\*3, CEE 32A/5P Socket\*2, SCHUKO 16A/3P\*3. All Sockets come complete with MCR and RCCB.

The unique design allows the Solar PV panels to tilt and adjust insuring maximum absorbtion of the suns rays during daylight hours

Model MPPT 150/85

Quantity lpcs

Max. PV Array Open Circuit 150V absolute maximum coldest conditions

145V start-up and operating maximum

Max. PV Array Power 4900 W@48V

Charge Voltage 'absorption' Default Setting-14,4 / 28,8 / 43,2 / 57,6v

Charge Voltage 'float' Default Setting-3,8 / 27,6 / 41,4 / 55,2v

Charge Voltage 'equalization' Default Setting-16,2V / 32,4V / 48,6V / 64,8V (adj)

Charge Algorithm Multi-Stage Adaptive

Max. Solar Charge Current 100 A

Data communication VE.Can, VE.Direct and Bluetooth

Effificiency (Peak) 98%

Dimension 185 x 250 x 95 mm(H\*W\*D)

Wind-Power

Model XTL-400 / 48Vac

Quantity 2 pcs

Max Power@ Air Speed 15m/s 24 kW

Rated Power/ Voltage 400W/ 48V AC

Leaf material Reinforced glass fiber reinforced carbon fiber

Leaf height 1050mm

Rated Air Speed 12m/s

Wind Wheel Diameter 0.55m

Min. Start-up Air Speed 1.5m/s

Model MPLS24-1S

Quantity 1pcs

Rated Prime Power 30kVA

Rated Power 24kW

Rate Voltage AC230V

Rated Standby Power 26.4kW

Speed 1500rpm

Engine Type 3-Cylinder, 4-Stroke, Air-cooled, Veritical

Controller DSE7320

Start System 12V Electrical

Tank Capacity 200L

Sound Level ≤65dBA@7m

Max System Charging Current 150A

System Discharging Current 250A

Dimension 520\*272\*220 mm (L\*W\*H)

Type Special colloid battery for photovoltaic

Inverter

Model Quattro 48/15000/200-100/100

Quantity 1 pcs

Rated Power 10kVA

Rated Input Voltage 48VDC

Rated Output Voltage 230Vac±2%

Efficiency (Peak) 96%

#### **Solar Panel**

Model JAM72S10MR 415W

Quantity 10pcs

Maximum Power 415W

Maximum Power Voltage 42.18VDC

Maximum Power Current 10.51A

Extending Type Sliding

Extending Area 22 m<sup>2</sup>

Dimension 2015×996×40 mm(L\*W\*H)

Power Tolerance 0~+5W

#### **Wind-Power Charging Controller**

Model MAX-14-WSII-06-1

Quantity 2 pcs

Rated Current 15A

Rated Voltage 48VDC

Applicable Wind-Power 600W

Dimension 158\*113\*60mm(L\*W\*H)

Display Type LED

Protection Function Over Speed, Over Charging, Battery Reverse

Polarity & Indirect Lightning Strike

Communication Port RS 232 (Standard) ; RS 485(Optional)
