

Atlas Rotationally Moulded Plastic Tanks

When you buy an Atlas Tank, you buy the best!

Whether you are replacing an old oil tank or installing a brand new heating system, you need to be sure you are using the best.

You want a strong, attractive tank at an affordable price. A tank that will give you security and many years of trouble-free service - a tank you can install and forget about - an Atlas Tank.

Choose from our wide range of designs. Every Atlas oil tank comes as standard with the installation kit, Watchman Sonic Advanced remote electronic gauge and SpillStop overfill prevention valve.

A complete proven range of tanks for today's market from Atlas.

Approved by the experts

Atlas tanks are manufactured to the highest standards; their attractive designs are all tested for quality and strength prior to despatch. You're on the right road with an Atlas tank because they are:

- Strong and light with built-in handgrips to make installation easy
- Well proven and respected design
- Carefully designed to prevent rainwater from entering
- UV stabilised so the colour will not fade

Important Information

Atlas Warranty

Product	Warranty Period
Bunded Oil Tanks	10 years
Fuel Depot	10 years
Fuel Depot Utility	10 years
AdBlue® Tanks	10 years
Potable & Non-Potable Water Tanks	10 years
Waste Oil Storage	10 years
Single Skinned Oil Tanks	2 years

Atlas Tanks' ancillary equipment has a 12-month warranty; dispensing hoses and nozzles have a 3-month warranty. Warranty may be void if the tank is improperly installed, misused, damaged, or repaired without Atlas Tanks' approval. Installation by a qualified OFTEC approved installer is required, following OFTEC codes of practice.

Before Installation

Prior to installing an oil storage tank, the installer should conduct a comprehensive risk assessment, prioritising the TI/133D Risk Assessment Forms provided by OFTEC. It's essential to be aware that regional requirements may differ. If you have any concerns, always contact your local OFTEC registered technician who can advise fully.

For installations at commercial, industrial, or institutional premises, a bunded tank is mandatory.

Automatic Overfill Prevention Valve

Deliveries made into tanks equipped with the SpillStop ensure that the environment is protected if an attempt is made to overfill the tank. This cleverly designed valve shuts off the fill point once oil reaches tank capacity. Suitable for any tank - single skin or bunded.

- Easily retro-fitted for environmental protection
- 2" BSP Connection
- Ideal for original fit by tank manufacturers
- BS EN 13616: 2004
- Type A TUV Nord Cert approved
