

Stop spills before they can start.

Automatic overflow prevention valve.

Deliveries made into tanks equipped with the **SpillStop** ensure that the environment is protected if an attempt is made to overflow the tank. This cleverly designed valve allows delivery of no more than *95% of a tanks capacity.

Product Benefits

- Suitable for any tank - single skin or bunded.
- Easily retro-fitted for environmental protection.
- 2" BSP Connection.
- Ideal for original fit by tank manufacturers.

*This may vary depending on the tank make and model.
